Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE one MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 22-28, drawn to a networked electrical computer or digital processing system comprising security means for preventing unauthorized disclosure of data, classified in class 713, subclass 201.
 - II. Claims 29-35, drawn to a method of electrical communication by means of network signaling, classified in class 340, subclass 286.02.
 - III. Claims 36-42, drawn to an automated electrical method of business comprising electronic shopping, classified in class 705, subclass 26.
2. The inventions are distinct, each from the other because of the following reasons:

Invention II is related to each of Inventions I and III, as process and apparatus for its practice. The inventions are distinct if it can be shown that *either*: (1) the process as claimed can be practiced by another, materially different apparatus, or by hand, *or* (2) the apparatus as claimed can be used to practice another, materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by other, materially different apparatus, such as, either an apparatus having no controller (an apparatus materially different than that of Invention I), or else an apparatus having no computer program to automatically perform the method (an apparatus materially different than that of Invention III).

Art Unit: 3627

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In this case: Invention I has separate utility from Invention III, such as for providing the audio data to be recorded directly to a recorder, without the use of a stage; and, Invention III has separate utility from Invention I, such as for first providing the audio data to be recorded to a stage, from where it can first be embellished, augmented, or otherwise processed, prior to being recorded. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was placed to Mr. Jeffrey R. Filipek (Reg. N^o 41,471), attorney for applicant, on October 8, 2002, to discuss an oral election to the above restriction requirement, but the call did not result in an election being made.

5. Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).
